TRADE LIST

Spring, 1916

CUSTOMERS are requested to state the mode of conveyance by which they desire their trees forwarded, When no route is named, we forward to the best of our judgment, without liability for error or delay.

RESPONSIBILITY.—After goods are placed on board cars here, we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

ALL CLAIMS must be made upon receipt of goods.

TERMS CASH, on or before delivery to express or railroad agents, unless by special arrangement.

Two hundred and fifty, twenty-five or five of any one variety will be furnished by the thousand, hundred and ten rates, respectively, but single plants of one or more varieties will not be sold at less than 15 cents each, except Vines and Herbaceous Plants, the minimum price of which will be 10 cents each.

PACKING CHARGED EXTRA, but only sufficient to cover cost of time and material consumed in the work.

POST OFFICE ORDERS payable at Dresher P. O., Montgomery County, Penna.

WESTERN UNION TELEGRAPH, AMBLER, PA. Use Nurserymen's Telegraphic Code or "A B C" Code, 4th edition.

VISITORS are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train stops at these stations.

NOTICE.—It is necessary that you should **TELEPHONE** us (Bell Phone, Ambler 226-W; Keystone Phone, Jenkintown 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is $2\frac{1}{2}$ miles from either station.

CERTIFICATE OF INSPECTION

Our nurseries are inspected several times each year, by inspectors of the Entomological Division of the Department of Agriculture of the State of Pennsylvania, and are free from insect pests and diseases. A certificate of the Department is attached to all shipments, and will also be furnished to customers if desired.

Deciduous Trees

It is an old saying that "The best is the cheapest in the long run" and this applies probably more nearly to nursery stock than any other thing. The difference in price between a poor tree and a good tree is comparatively little, only a few cents, but the results cannot be measured in dollars and cents.

Our trees are frequently transplanted, to establish a good root system, they are "staked" so that every tree is grown with a perfectly straight trunk and the heads of the trees are kept pruned into symmetrical shape. Our soil is heavily fertilized and the trees are given constant cultivation and no effort spared to produce the very best quality. These facts should all be taken into consideration when comparing our prices with those of other nurseries.

Norway Maples

Our Norway Maples all have good, straight trunks and branched just right for street planting. They have been several times transplanted and have good fibrous roots.

Mr. John W. Hutchison, Purchasing Agent, Central Park, N. Y., after inspecting and purchasing one hundred of our Specimen Norway Maples, told us that our block of these trees was the finest and most perfect and uniform lot of Norway Maples on the market today. They are planted ten by ten feet apart, have perfectly straight stems, of even height and all evenly branched from the ground.

Board of Park Commissioners Minneapolis, Minn.

Edmund J. Phelps, Pres. Thomas Voegeli, Vice Pres.
Theodore Wirth, Superintendent
C. A. Bossen, Asst. Superintendent
J. A. Ridgeway, Secretary
C. J. Rockwood, Attorney

May 22, 1914.

Thomas Meehan & Sons,
Dresher, Pa.

Dear Sirs:—

I wish to inform you that the shipment of Wier's cut-leaf maple arrived in good condition yesterday. They are the finest lot of trees it has been my privilege to receive for a good many years.

I also want to compliment you on the care with which they have been dug, which is characteristic of all the goods received from you by us. If all nurserymen were as careful in digging and packing their goods as you are we would have very little to complain of on that account. I have had some great disappointments along this line during the past spring and it gives me pleasure to be able to write a letter of commendation as I have occasion to do now.

With kind regards, I remain,

Yours very truly,

BOARD OF PARK COMMISSIONERS,

Theodore Wirth, Supt.

TW-AD

Japanese Maples

"American Grown" is a very fitting remark at this time, and is particularly suited in connection with our Japanese Maples which are all "Pennsylvania grown." Why buy cheap, uneven, hide-bound foreign stock when you can get the very best here at reasonable prices and every plant guaranteed true to name.

W. A. Marshall
Real Estate and Lumber
30 N. Eighth St.
Shamokin, Pa.

July 21st, 1915.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:—

I wish to congratulate you on the fine lot of two hundred (200) Norway Maple Trees that I purchased from you for the Shamokin Cemetery, Shamokin, Pa., last spring. Not a single tree has died and all are doing fine. This is due partly to the fine stock, all nice fine, clean trees and to the magnificent root system, a fine hair-like mass of fibrous roots with enough laterals to hold the tree firmly. These trees have been commended by all who have seen them. You certainly deserve much credit for sending out such stock.

Yours truly,

W. A. MARSHALL,
Treasurer, Shamokin Cemetery.

W. W. DAVIS, Pres., A. E. FOWLIE, Sec. and Treas. H. K. DAVIS, Vice Pres.

Great Neck Hills

Owned by

Great Neck Improvement Company

Office on the Property
Great Neck Station
Long Island

New York Office
1047 Marbridge Bldg.
1328 Broadway

New York, February 2nd, 1915.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:—

In the spring of 1914 I was entrusted with the preparations for, and selection of, trees for double rows of planting on both sides of a new avenue being laid out at Great Neck Hills, Long Island, a suburban development within twenty-five minutes of the Pennsylvania Station.

The avenue in question will be the most imposing of the newer section of this handsome property, so I visited three States in the selection of trees for this thoroughfare. Being impressed with the quality of your Sweet Gums and your offer to furnish the trees dug with ball of earth and ball enclosed in burlap, and to guarantee 90 per cent. of thrifty, living trees, three months after trees were transplanted, led me to contract with you for 91 Sweet Gums of a uniform habit of growth, allowing therefor a variation in trunk diameter of $2\frac{1}{4}$ to $3\frac{1}{2}$ inches.

In approving your bill this day for settlement in full of final payment, I am pleased to inform you that although soil and atmospheric conditions were most unfavorable to a successful undertaking, the transplanting was most satisfactory and every tree lived.

Yours truly,

C. S. VAN NUIS,

Agronomist for Great Neck Improvement Co.

A NOVEL PROPOSITION

Here is a proposition we made last Spring, and on the strength of it, several large orders were placed with us.

"If you knew that you could get Sweet Gums, a hardy strain, grown from seeds collected as far north as Philadelphia, and get 90 to 100 out of every 100 to grow, would it interest you?"

The great objection to using Sweet Gums is the difficulty of getting them to grow. It is the most beautiful tree in cultivation, either as a specimen lawn tree, or for street planting. It would be largely used if successful transplanting could be assured.

We can dig our Sweet Gums with a solid ball of earth sewed in burlap, reducing risk of transplanting to a minimum. See illustration.

Following letter is interesting:

Grand Rapids, Mich.,

December 14, 1914.

Gentlemen:—

Thomas Meehan & Sons.

The 50 Sweet Gums, 8 to 10 ft., purchased of you last Spring, balled in burlap, arrived in the very best possible condition, every tree having made a very substantial growth during the Summer. Every tree is alive.

Very truly yours,

Eugene V. Goebel,

Supt. Parks.

Illustrates how we ball and Burlap Sweet Gums

When ordering trees be sure to say if you want them balled, as we also offer them dug without ball at regular list price.

Cost of packing trees in bales or boxes would be additional. If sufficient quantities are taken to warrant shipping in car, the freight would be proportionately less, and the cost of box and packing would be saved.

Meehan's Globe Head Mulberry

Introduced by us last spring for the first time.

We are frequently asked as to its hardiness. It is a "sport" of the Russian mulberry, and will stand any climate where the Russian mulberry will grow.

It is as hardy as the Tea's Weeping Mulberry and more attractive and better than *Catalpa Bungei*.

Supply for this year limited. Place your order early to insure delivery.

Price, two year heads \$1.25 each.

Geneva, New York, September 17, 1915.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:—

Regarding the new Globe Headed Mulberry which you sold us last spring, would say that we consider this tree a decided acquisition, especially for use in formal gardens. The fact that it can be kept small makes it more suitable than the *Catalpa Bungei* for certain situations. We believe it is perfectly hardy, and we expect to propagate it largely.

Very truly yours,

W. & T. SMITH COMPANY.

***Tilia dasystyla* (euchlora) Yellow Twigged Linden**

The yellow-twigged or Crimean Linden is a tree which in the past has been little used for street planting. Four years ago we induced the Shade Tree Commission of East Orange, New Jersey, to plant one street with these trees to prove their desirability for this purpose. In a letter received from Mr. Ernest H. Bennett, Supervising Foreman for the Commission, he writes "the trees were planted in the Fall of 1911, on Kenwood place. There are in all seventy-five trees in perfect condition, not having lost a single tree. The trees are very uniform in size and make a beautiful showing, and I predict that this will be one of our most beautiful streets, they are so regular in their growth. We feel proud of our trees."

The tree is very symmetrical in its growth. The foliage is light green with bright shiny surface, remaining on the tree without changing color until late in the fall.

Tilia Europaea, European Linden

Our stock of European Lindens in the 3 to 3½ and 3½ to 4 inch calliper grades consists of about twelve hundred trees, all of which have been transplanted within the last three years. Every tree has a perfectly straight trunk, a well developed head, and is branched from six to seven feet from the ground. They are perfect trees for street planting.

The State Teachers' College

Greeley, Colorado

R. G. Dempsey

Superintendent of Grounds

June 23, 1915.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:—

The trees and shrubs which were ordered of you have been received and are planted and all growing nicely. We wish to express our entire satisfaction with the quality of the goods and the thorough packing.

We have been using your trees, shrubs, roses and herbaceous plants for eight years and they have always given complete satisfaction. We have at present about 20,000 of your plants on our campus and they are all doing fine.

Very truly yours,
R. G. DEMPSEY,
Supt. of Grounds.

**CRATAEGUS CORDATA
WASHINGTON THORN
Balled and Burlapped**

The Washington Thorn is one of the most ornamental of the small growing trees. The foliage is of a good dark green color in summer and in the fall it takes on the most beautiful shading of yellow and crimson.

Clusters of small white flowers cover the tree in early spring, these are followed by small berries about the size of a pea, which in fall are of a deep coral red, holding on the tree until towards early spring.

Unfortunately trees of larger sizes do not transplant easily without severe pruning. To overcome this we are prepared to ball and burlap certain sizes by the same method as we do the Sweet Gum as described on page 10. This practically insures safe transplanting.

Prices balled and burlapped	Per 10	Per 100
6 to 8 ft.	10 00	90 00
8 to 10 ft.	12 00	110 00
10 to 12 ft.	18 50	165 00

City of Springfield, Mass.
Department of Public Parks
Charles E. Ladd, Supt.

Springfield, Mass., April 23, 1915.
Thomas Meehan & Sons,
Dresher, Pa.

Dear Sirs:—

Replying to your letter of the 21st inst., would say that you may ship the 200 *Myrica cerifera* as described in your letter.

Permit me to compliment you on the order for trees and shrubs which you sent us. In all my experience, covering many years, we have never received such a satisfactory lot of nursery stock and I shall take pleasure in recommending you to any who may wish to purchase.

Very truly yours,
CHARLES E. LADD,
Supt. Public Parks.

Board of
Park and Cemetery Commissioners
Grand Rapids, Mich.

December 14, 1914.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:—

The Sweet Gums, purchased of you last Spring balled and burlapped, arrived in the very best possible condition, every tree having made a very substantial growth during the Summer. Every tree is alive.

Very truly yours,
EUGENE V. GOEBEL,
Superintendent of Parks.

West Pittston Cemetery

Pittston, Pa., April 28th, 1915.

Messrs. Thomas Meehan & Sons,
Wholesale Nurserymen,
Dresher, Pa.

Dear Sirs:—

Just a line to let you know that the car of deciduous trees and evergreens which you shipped to the West Pittston Cemetery, West Pittston, Penna., arrived O. K., and I must say that I never saw a finer lot of evergreens, and several of the Board of Managers, who have seen the stock, say so too.

You have my sincere thanks, as I was particularly anxious to make a good showing with this planting.

Thanking you for the personal attention given to this order, I remain,

Yours truly,
JOHN STRUTHERS, Sect.

Evergreens

See also Evergreen Shrubs

In no other class of nursery stock are prices usually so deceptive as they are in evergreens, because the height shown in the list gives no idea of the quality. Quality is represented by the bushiness of the plant and the number of times it has been transplanted, because transplanting is what produces the fibrous root system, so all important to an evergreen. Good feeding is also necessary to impart health, vigor and the rich color to the foliage.

Our aim is to produce the best. Health, vigor, good color and an abundant root system, and to accomplish this, we transplant our evergreens every two years into new, heavily manured ground.

All evergreens are dug with ball of earth and the ball sewed in burlap. The cost of this is included in the price quoted in the catalogue.

Juniperus Chinensis

This is one of the finest and most hardy of all the Junipers. It is of upright habit and dense in its growth. It possesses a dark green color, which does not change during the winter, but keeps just as green as it is in summer. This is a distinct advantage. It is useful for filling in evergreen beds.

Junipers for Ornamental Planting

Throughout the entire list of Evergreens there are none so useful as the Junipers. First they have the advantages of hardiness, and adaptability to almost all soils and situations. Then they have a character all their own, and the great diversity of color of foliage makes it possible to plant an entire bed or group of them without the use of other species which may not be as hardy or satisfactory. We have gradually been extending our plantings of these Junipers until now we believe we have one of the largest and finest collections in any nursery in this country.

All evergreens balled and burlapped at the prices listed.

Juniperus Chinensis Pfitzeriana

This is without a doubt the most beautiful and graceful of all evergreens. It seems almost impossible to describe its beauty, and we must let the illustration speak for itself. The color of the foliage is dark green without shade or variegation of any sort. It is perfectly hardy anywhere in this country. We have unquestionably the largest stock of this wonderful evergreen in the United States.

Juniperus Virginiana Glauca
Blue Red Cedar

Everyone knows the Native Red Cedar, and there is no evergreen which just fills its place in landscape planting. This is a handsome variety of it, with steel blue foliage. Its hardiness extends to any part of the United States and Canada. We have probably the largest stock of this Blue Cedar in this country.

Retinispora Plumosa Aurea

The beautiful golden Retinispora is almost indispensable in evergreen planting. While of fairly rapid growth it may be kept any size desired by constant shearing, and this shearing adds to its beauty as the golden color is brighter on the new and young growth. We have a large stock of this magnificent evergreen, and in large sizes.

Meehan's Mallow Marvels

Sometimes named "Giant Flowering Marshmallows"

SINCE the introduction of our Mallows several years ago, thousands of them have been widely distributed over the entire country and have given the utmost satisfaction. They are now specified in planting lists by Landscape Engineers, Superintendents of Parks and Cemeteries.

It makes a vigorous growth—strong roots making a bushy clump five to seven feet in one season and blooming profusely from midsummer to frost. Being an herbaceous plant it dies to the ground in the fall, shooting from the root again the following spring.

The flowers measure from eight to twelve inches in diameter, and are sold in separate colors, in red, pink and white.

The plant is extremely hardy, having been tested and grown in all parts of the United States and Canada.

It grows naturally in moist ground but thrives equally as well in any good, rich soil.

This same plant has recently been catalogued by other nurserymen under the name of "Giant Flowering Marshmallows."

Hardy Herbaceous Perennials

Ornamental Grasses and Ferns

Our Herbaceous Department is in charge of experts, men who are thoroughly trained in the growing, handling and shipping of these popular plants. By a thorough system of propagation and transplanting our stock is kept in the highest state of perfection, so that every plant we send out is young, vigorous and brought to a condition where it will give the customer the best results.

In making comparison of our prices with those of other nurseries bear in mind the fact that our plants are mostly field grown clumps and not the small divisions usually supplied by other growers.

July to September, etc., indicates the period of flowering.

THOMAS H. DESMOND,

Landscape Designer

711 MAIN ST., HARTFORD, CONN.

Member of the American Society of Landscape Architects

October 26, 1914.

Thomas Meehan & Sons,
Dresher, Pennsylvania.

Gentlemen:—

The trees and shrubs which you shipped to Simsbury, on my order, have been received and are planted. I wish to express the entire satisfaction of both my client and myself with the quality of the goods and the thorough packing. Without question it is the best looking shipment of goods of this class that it has been my pleasure to handle. Had it been otherwise I should not have hesitated to advise you, and therefore feel it is only fair to let you know it was entirely satisfactory.

Very truly yours,

THOMAS H. DESMOND.

Shade Tree Commission.

CITY OF EAST ORANGE, NEW JERSEY

Aug. 24, 1914.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:-

I am sending you some photos I have just lately made of the Yellow-twigged Lindens, as they will convey to you the true appearance of these trees better than anything I can possibly say. The trees were furnished by you and planted in the Fall of 1911, on Kenwood Place. There are seventy five trees, in perfect condition, not having lost a single tree. The trees are very uniform in size and make a beautiful showing, and I predict that this will be one of the most beautiful streets in East Orange.

Yours very truly,
(Signed) Ernest H. Bennett,
Supervising Foreman.

The Robinson Press, Hatboro, Pa.

Office of City Forester, Baltimore, Md.

Thos. Meehan & Sons, Dresher, Penna.

Gentlemen:—

In the Spring of 1908 our Park Board purchased of you some 600 European Lindens of 3 to 3½ inch caliper. In 1911 they bought from you another lot of 326 trees of same variety and size. These trees were planted on Charles Street (extended) between 29th Street and University Parkway, and during the past four of five years I have had the opportunity of watching their development. The loss in this planting has been practically negligible and the growth of the trees has been altogether satisfactory. I consider this tree an admirable one for street and park planting, and that its good points places it in a class above the average of our shade trees. I am so pleased with the species that I have used it in the planting of several of our fine streets during the past few years. I have every reason to continue my faith in the trees and hope to use some more of them as our funds here will permit.

Very truly yours,
R. BROOKE MAXWELL, City Forester.

June 17th, 1915.
